Work Experience

Anorbank <i>Java Backend Developer Intern</i>	Tashkent <i>Jul 2026 – Sep 2026</i>
• Worked with 25+ microservices, gaining practical experience with distributed backend architecture, service communication, monitoring, and troubleshooting. • Developed and improved unit tests while resolving SonarQube, code-quality, dependency, and library-related issues to improve code reliability and maintainability. • Investigated and fixed backend bugs, service issues, and Git merge conflicts across multiple microservices, strengthening debugging and collaborative development skills. • Deepened practical knowledge of Apache Kafka and event-driven architecture through hands-on work and technical mentorship from senior engineers.	
Tenzorsoft <i>Java Software Engineer</i>	Tashkent <i>Feb 2025 – Jul 2026</i>
• Developed and maintained Java/Spring Boot backend services across enterprise laboratory, educational, and social platforms. • Designed and implemented RESTful APIs and microservices, including migration from a monolithic architecture to scalable microservices using Spring Cloud. • Implemented Apache Kafka for asynchronous inter-service communication and Redis caching to improve performance and reduce database load. • Investigated and resolved production bugs, runtime exceptions, dependency conflicts, and performance issues, while implementing features such as WebSocket messaging, Firebase notifications, and chunk-based file uploads.	

LEADERSHIP EXPERIENCE

IT Community of Uzbekistan <i>Volunteer</i>	Tashkent <i>Nov 2024 – Present</i>
• Actively volunteered at nationwide IT community events, traveling to multiple regions and cities to support educational and career-oriented initiatives. • Assisted in organizing and hosting IT events, introducing participants to core concepts such as IT fundamentals, startup ecosystems, and job entry strategies in the tech industry. • Orchestrated registration logistics for major IT events, managing a team of 5 volunteers to streamline attendee check-in for 500+ participants. • Engaged directly with participants, providing guidance on LinkedIn usage, personal branding, and professional networking.	

EDUCATION

PDP University <i>Bachelor of Software Engineering</i>	Tashkent <i>Oct 2024 – Jun 2028</i>
• Developed a startup project during PDP University Orientation Week focused on automating fuel station services. • Designed a platform with real-time fuel prices, reservation, and queue monitoring features. • Collaborated in a 20-member multidisciplinary team on problem analysis and solution design. • Achieved 2nd place among 14 startup teams, demonstrating innovation and teamwork.	

CERTIFICATES & ACHIEVEMENTS

- Completed 60+ certificates in IT-related fields including hackathons, bootcamps, university programs, and online education platforms. [link](#)

SKILLS

Java, Spring, Spring Cloud, Microservices, Docker, Databases(MongoDB, PostgreSQL), Kafka, RabbitMQ, Redis, REST APIs, CI/CD, Agile & Scrum, Jira.
